

Digital Tachograph support

Live display of tachograph information in your office

Who is driving the truck? How much time did the driver spend on driving and breaks today?
Which driver has enough time left to do the next job? Which stages has the driver already completed?

All this information is recorded on the digital tachograph, but TomTom Business Solutions helps heavy good vehicle fleet operators to see this information displayed live in local offices or despatch centre.

Live tachograph information in TomTom WEBFLEET®

Since 2006, to comply with European legislation, every new registered heavy commercial vehicle is obliged to have a digital tachograph installed. How does this help with your daily business information needs?

Fleet managers do not want to wait days or weeks for trucks return to the depot before they can access information recorded on the digital tachograph. TomTom provides all the information you need, immediately.

With TomTom LINK 300 installed in your trucks, you can immediately see all the information recorded on the digital tachograph. See it immediately in TomTom WEBFLEET® to manage your daily fleet and order processes much more efficiently.

Name	Mobile phone	Vehicle	Status	Daily total
Martin W.		053 - T2543R105345	Work	5h30min
Patrick P.		027 - F2348G003234	Break	0min
Ralf N.		111 - X1183V009942	Work	3h51min
Christian F.		003 - V3252R007246	Work finished	0min
Maurice L.		067 - M11425000032	Driving	1h19min
Tom P.		072 - R26423X42842	Standby	45min
Robert Z.		122 - M84598G00047	Work	26min
Frank T.		052 - V12124R22404	Break	3h04min
Tim K.		116 - T87523K00009	Driving	2h47min
Marie F.		002 - P42342V10001	Work finished	0min
Michelle C.		061 - F21356F10052	Work	50min

Assign orders more efficiently

Support for the digital tachograph with TomTom means you are constantly informed on how much time your driver has been driving and how long he has been waiting.

See if the driver or the co-driver is driving and find out how much driving time is available for that vehicle on this day.

Assign the right driver to the right job. See at a glance which of your drivers still has enough driving time to complete the next job.

Detailed work time status information

There's no longer any need to duplicate your work time reports. Always be up-to-date about daily driving and pausing times and driver availability.

All information is clearly displayed in TomTom WEBFLEET® and quickly available thanks to TomTom's easy one-click reporting.

Integration possibilities

Why wait for your trucks to return to the depot to feed the digital tachograph's driving and work time information into your office application.

Get in touch with TomTom Business Solutions integration partners and find out how TomTom WEBFLEET® can help you make use of the collected data using your existing office applications to create fully customised work time reports. You can also monitor driving and pausing times to ensure none your drivers violate local driving laws.

Specifications

- Support for digital tachograph: VDO DTCO, Stoneridge SE5000, Actia Smartech
- Works with:
 1. TomTom LINK 300 – firmware update required
 2. TomTom GO 520/720/920, 530/730/930, 7000, 7000 TRUCK - software update required, TomTom PRO 7xxx (thousand) series.
- Only supported with certain TomTom WEBFLEET® subscriptions
